

THE ULTIMATE CSS CHEAT SHEET BY PUSHAUNE

How CSS works

Selectors

*	Target all items. Can be used with descendants items: <code>#container *</code>
#my_id	Target a specific id
.my_class	Target a specific class
X Y	Target descendants items
X	Target all the same items
X + Y	Target an adjacent item
X > Y	Target the child item

X ~ Y	Target any adjacent item contained in a specific parent
X[title]	Target any specific items with a title
X[href="https://www.pushaune.com"]	Target any specific items with a specific href
X[href*="pushaune"]	Target any specific items with a value which appear somewhere in href
X[href^="http"]	Target any specific items with http which begins with http
X[href\$=".jpg"]	Target any specific items with http which end with .jpg
X:hover	Target any specific items when the user hovers over it
X:link	Target any specific link items which have yet to be clicked on
X:visited	Target any specific link items which have been clicked on
X:checked	Target a specific item that has been checked, like a checkbox
X::before	Target a pseudo-element that is the first child of the Targeted item
X::after	Target a pseudo-element that is the last child of the Targeted item
X:not(selector)	Target any specific items, except for the ones which match the Targetor
X::first-line	Target the first line of the item
X::first-letter	Target the first letter of the item
X:nth-child(n)	Target specific elements in a stack (n as value or a variable)
X:last-child(n)	Target specific elements in a stack (n as value or a variable)
X:nth-last-child(n)	Target specific elements in a stack beginning at the end of the collection
X:nth-of-type(n)	Target specific elements in a stack based on his type
X:nth-last-of-type(n)	Target specific elements in a stack based on his type, beginning at the end
X:first-child	Target only the first child of the item's parent
X:last-child	Target only the last child of the item's parent
X:only-child	Target items which are the only child of its parent
X:only-of-type	Target items which are the only child of its parent based on his type
X:first-of-type	Target the first siblings of its type

Positioning

display	none block inline inline-block flex
position	relative absolute fixed static sticky
top	value (px, em or %) auto initial unset
right	value (px, em or %) auto initial unset
bottom	value (px, em or %) auto initial unset
left	value (px, em or %) auto initial unset
clear	none left right both inline-start inline-end
z-index	auto value
direction	ltr rtl
overflow	visible hidden scroll auto
visibility	visible hidden collapse
float	left right none inline-start inline-end

Flexbox /* container */

flex-direction	row row-reverse column column-reverse
flex-wrap	nowrap wrap wrap-reverse
justify-content	flex-start flex-end center space-between space-around space-evenly
align-items	flex-start flex-end center baseline stretch
align-content	flex-start flex-end center space-between space-around stretch

Flexbox /* items */

order	value
flex-grow	value
flex-shrink	value
flex-basis	value auto
align-self	auto flex-start flex-end center baseline stretch

Lists

counter-reset	[<custom-ident> value]
counter-increment	[<custom-ident> value]
list-style-type	disc circle square decimal georgian cjk-ideographic kannaada (custom)
list-style-image	url none
list-style-position	inside outside

Colors and background

color	#hexadecimal rgb rgba
background-color	#hexadecimal rgb rgba
background-attachment	scroll fixed local
background-repeat	repeat-x repeat-y [repeat space round no-repeat
background-image	url(path/to/my/image.ext)
background-position	left center right top bottom value (px, em, vh or %)
background-size	cover auto contain value (px, em, vh or %)

Tables

caption-side	top bottom block-start block-end inline-start inline-end
table-layout	auto fixed
border-collapse	collapse separate
border-spacing	value (px)
empty-cells	show hide

Miscellaneous

Cursor	auto default none context-menu help pointer progress wait cell crosshair text vertical-text alias copy move no-drop not-allowed e, n, ne, nw, s, se, sw, w, ew, ns, nesw, nwse, col, row -resize all-scroll zoom-in zoom-out grab grabbing cursor: url(cursor1.png) 4 12, auto;
quotes	ex: "«" "»";

Font

font-family	"Font name", font, sans-serif
font-style	normal italic oblique
font-weight	normal bold bolder lighter 100 200 300 400 500 600 700 800 900
font-stretch	normal ultra, semi, extra, -condensed ultra, semi, extra, -expanded
font-size	value (px, em or %) xx, x, -small medium xx, x, -large larger smaller
font-size-adjust	value (px, em or %)

Text

text-indent	value (px, em, vh or %)
text-align	start end left right center justify match-parent
text-decoration	underline wavy line-through none dashed blink overline
text-shadow	(color) (offset-x) (offset-y) (blur-radius)
letter-spacing	value (px, em)
word-spacing	value (px, em)
text-transform	none capitalize uppercase lowercase full-width
white-space	normal pre nowrap pre-wrap pre-line
line-height	value (px, em)

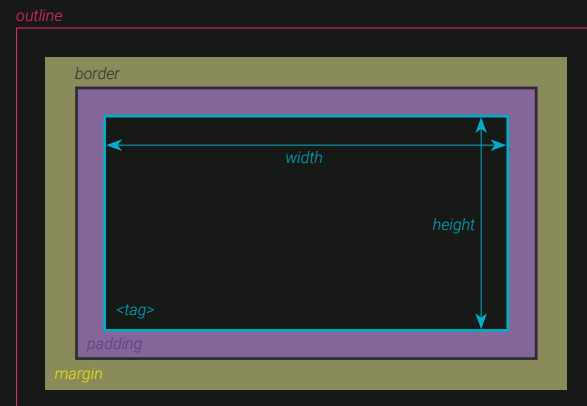

Dimensions

width	value (px, em, vh or %)
height	value (px, em, vh or %)
max-width	value (px, em, vh or %)
max-height	value (px, em, vh or %)
min-width	value (px, em, vh or %)
min-height	value (px, em, vh or %)
vertical-align	value (px, em, vh or %)

Boxes

margin	value (px, em, vh or %)
padding	value (px, em, vh or %)
border-style	none hidden dotted dashed solid double groove ridge inset outset
border-color	#hexadecimal rgb rgba
border-width	value (px, em or %)
border-image	image-source slice height width outset repeat
border-radius	value (px, em or %)
outline-width	value (px, em or %)
outline-style	none hidden dotted dashed solid double groove ridge inset outset
outline-color	#hexadecimal rgb rgba
box-sizing	content-box border-box
box-shadow	(inset, nothing) (horizontal length) (vertical length) (blur radius) (spread)

Box model

Note: When using **box-sizing: border-box;** the padding and the border will be included in the **width** and **height** values (recommended).

Transitions

transition-delay	value (s or ms)
transition-duration	value (s or ms)
transition-property	any css value all
transition-timing-function	ease ease-in ease-out ease-in-out cubic-bezier

Transform

transform-function	matrix translate scale rotate skew perspective
backface-visibility	visible hidden
perspective	value (px, em or %)
perspective-origin	x-position y-position (px, em or %)
transform-box	border-box fill-box view-box
transform-origin	value (px, em or %)
transform-style	flat preserve-3d

Animation

animation-delay	value (s or ms)
animation-direction	normal reverse alternate alternate-reverse
animation-duration	value (s or ms)
animation-fill-mode	none forwards backwards both
animation-iteration-count	value infinite
animation-name	any custom name
animation-play-state	running paused
animation-timing-function	linear ease ease-in ease-out ease-in-out cubic-bezier step-start step-end steps frames

Multi-column

column-count	value auto
column-fill	auto balance balance-all
column-gap	value (px, em or %)
orphans	value
column-rule-color	#hexadecimal rgb rgba
column-rule-style	none hidden dotted dashed solid double groove ridge inset outset

column-rule-width	value (px, em or %)
column-span	none all
column-width	value (px, em or %)

@-rules

@charset	<charset> (eg. utf-8)
@font-face	font-family src font-variant font-feature-settings font-stretch font-weight font-style
@import	url
@keyframes	X%(property, value;)
@media	all print screen speech
@page	Rules when printing a document

Color/Image Effects

filter	blur brightness contrast drop-shadow grayscale hue-rotate invert opacity saturate sepia
mix-blend-mode	normal multiply screen overlay darken lighten color-dodge color-burn hard-light soft-light difference exclusion hue saturation color luminosity
opacity	value (between 0 and 1)
